

# **The Safety Management of at seas by RFID system application**

27. August 2010  
GU, Ja-Yeong

Tokyo University of  
Marine Science & Technology

# Contents

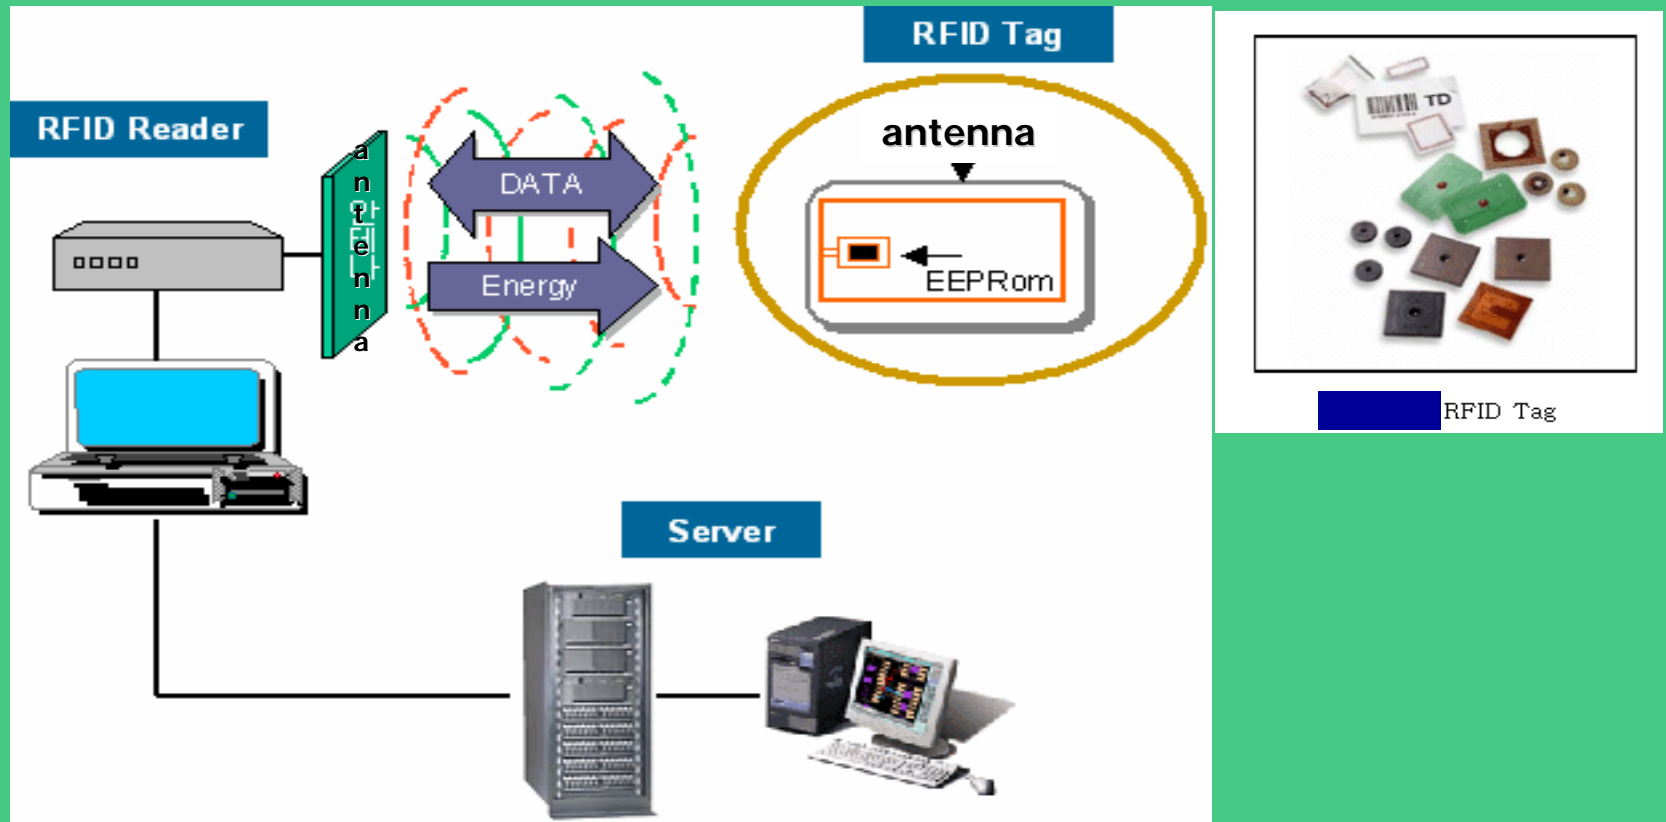

- What is RFID? Concepts, Types, Frequency
- Comparison of RFID to Barcodes
- Current Uses of RFID
- Background of Marine RFID Development
- Marine RFID Concepts & Test
- Marine RFID Application
- Ship Free Pass System
- Plan in the Future

# What is RFID?

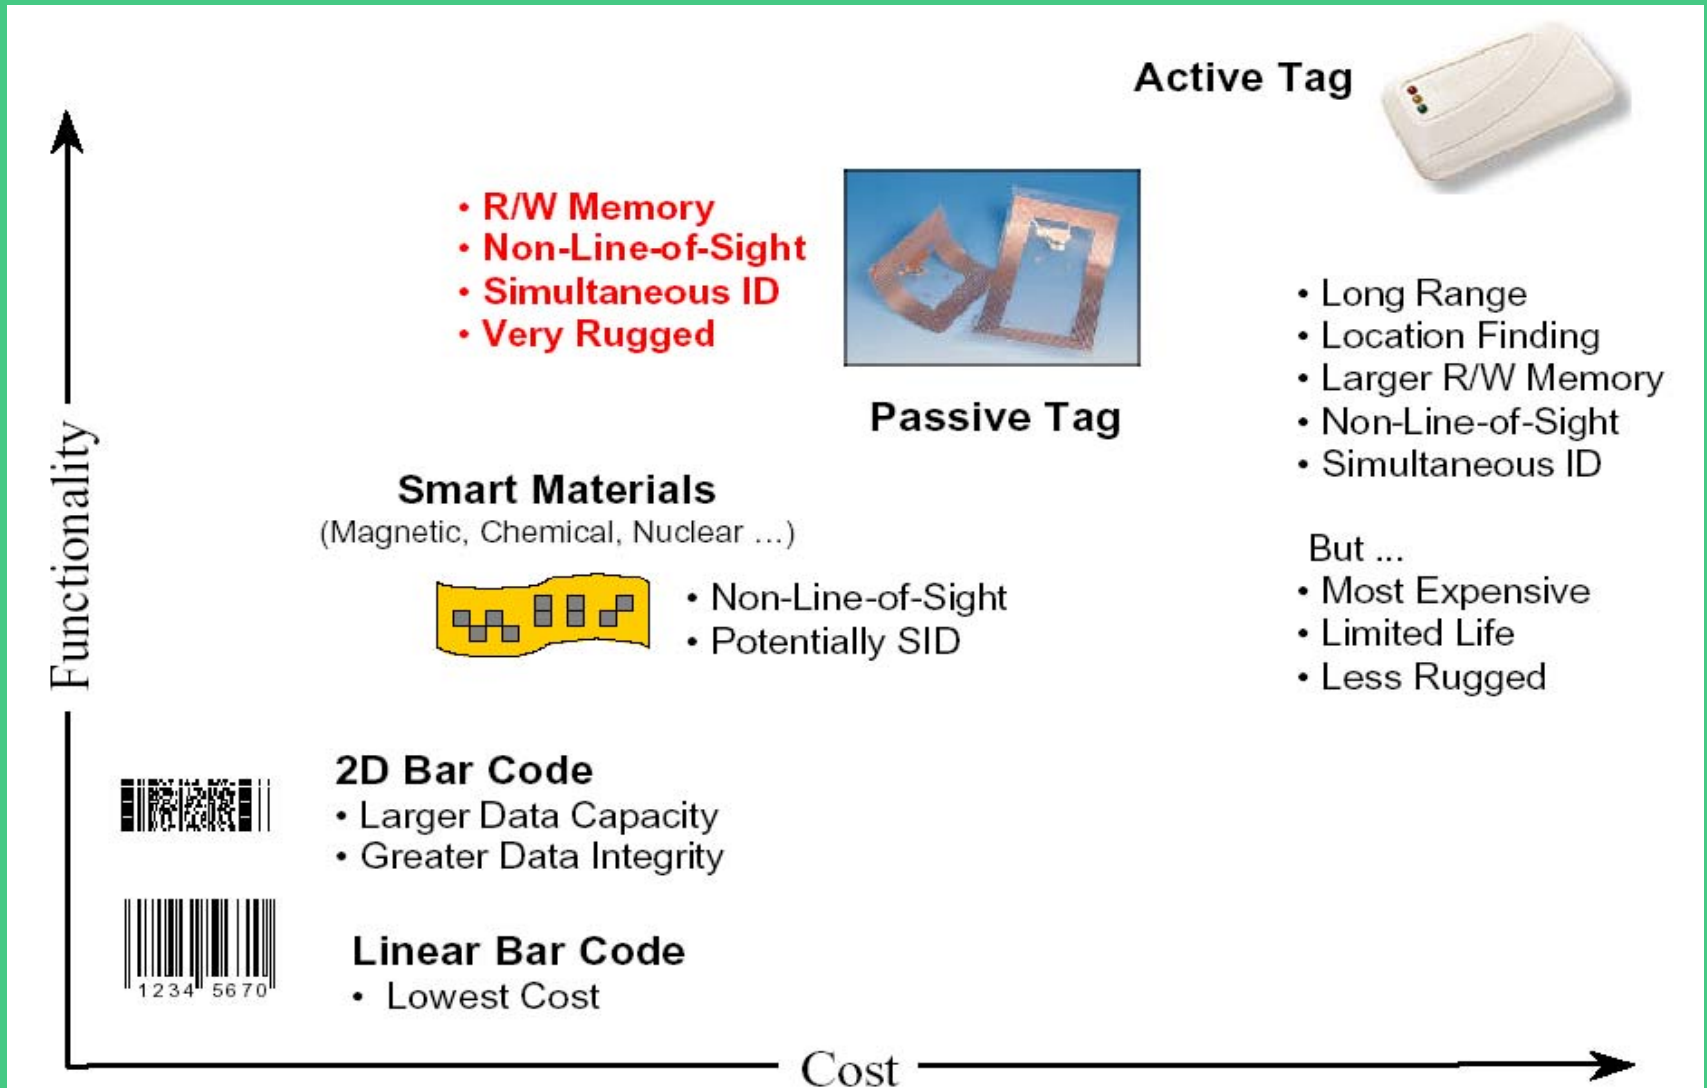

- RFID(Radio Frequency Identification) is a method of identifying unique items using radio waves
- RFID systems include electronic devices called *tags* and *readers*
  - *Is RFID a barcode?*

# RFID Concepts

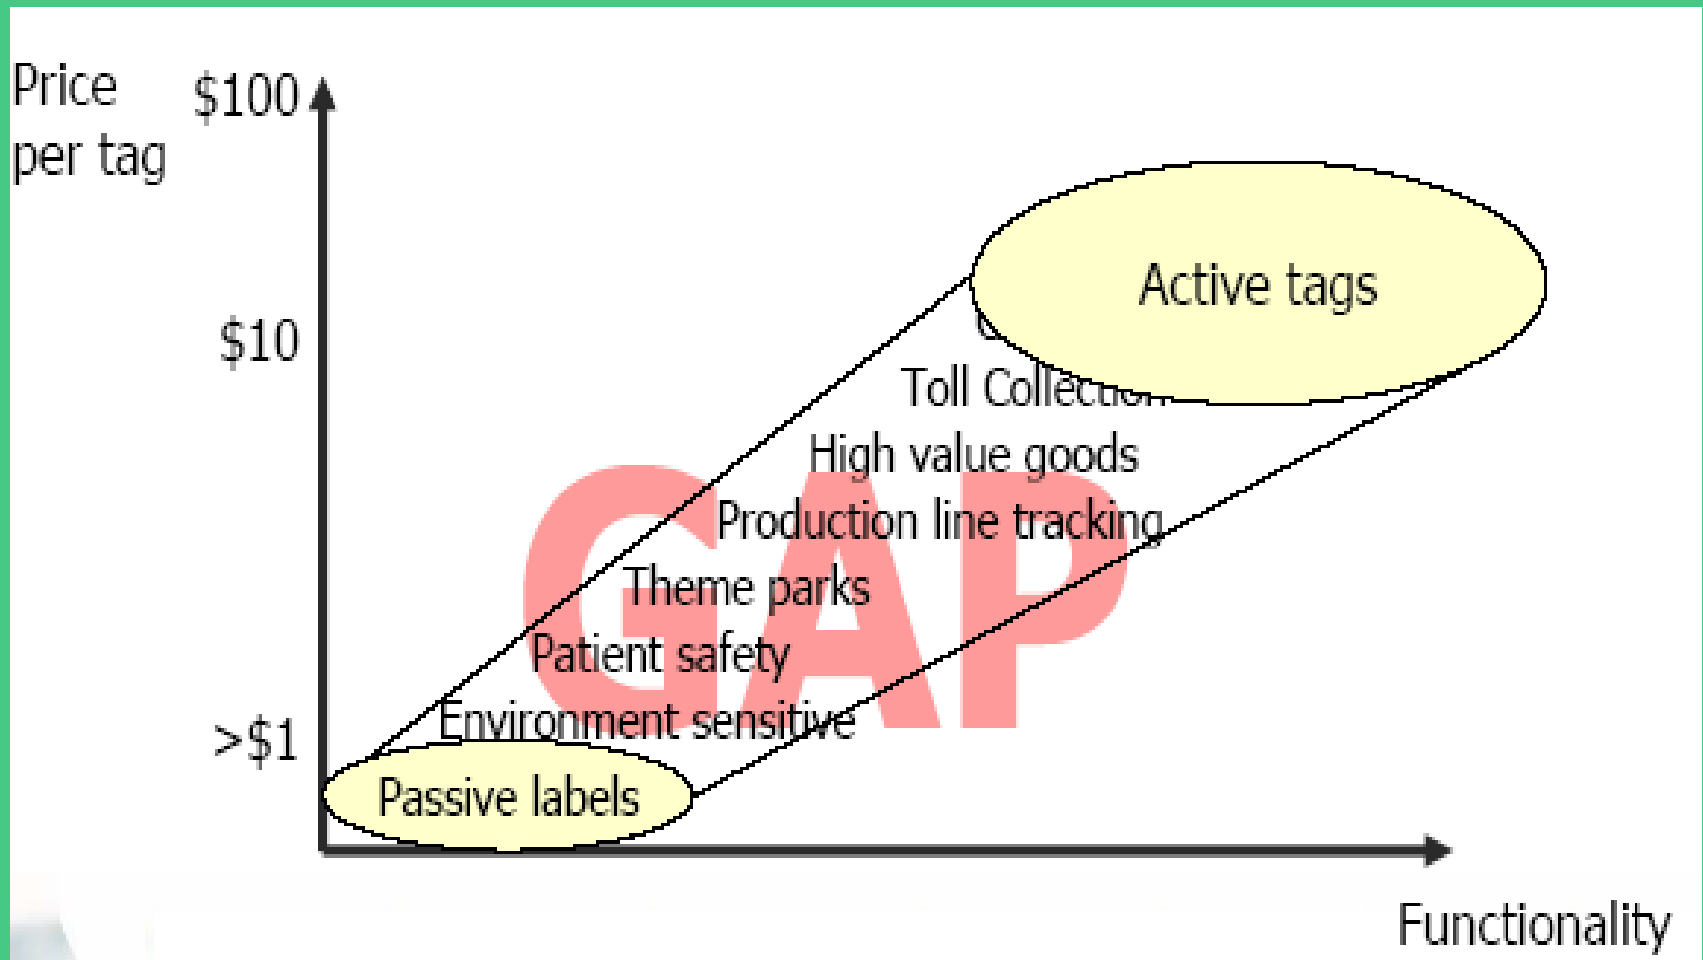

- Identify objects from distance by using small IC with RF transponder
- Track and trace the objects
- Provide the enterprises with real-time view of their assets

# RFID Types : Active or Passive(1)

# RFID Types : Active or Passive(2)

# RFID Frequency & Applications

Embedded  $\mu$ -chip

Passport, ID card

Global

125KHz, 134KHz  
(ISO 18000-2)

13.56Mhz  
(ISO 18000-3)

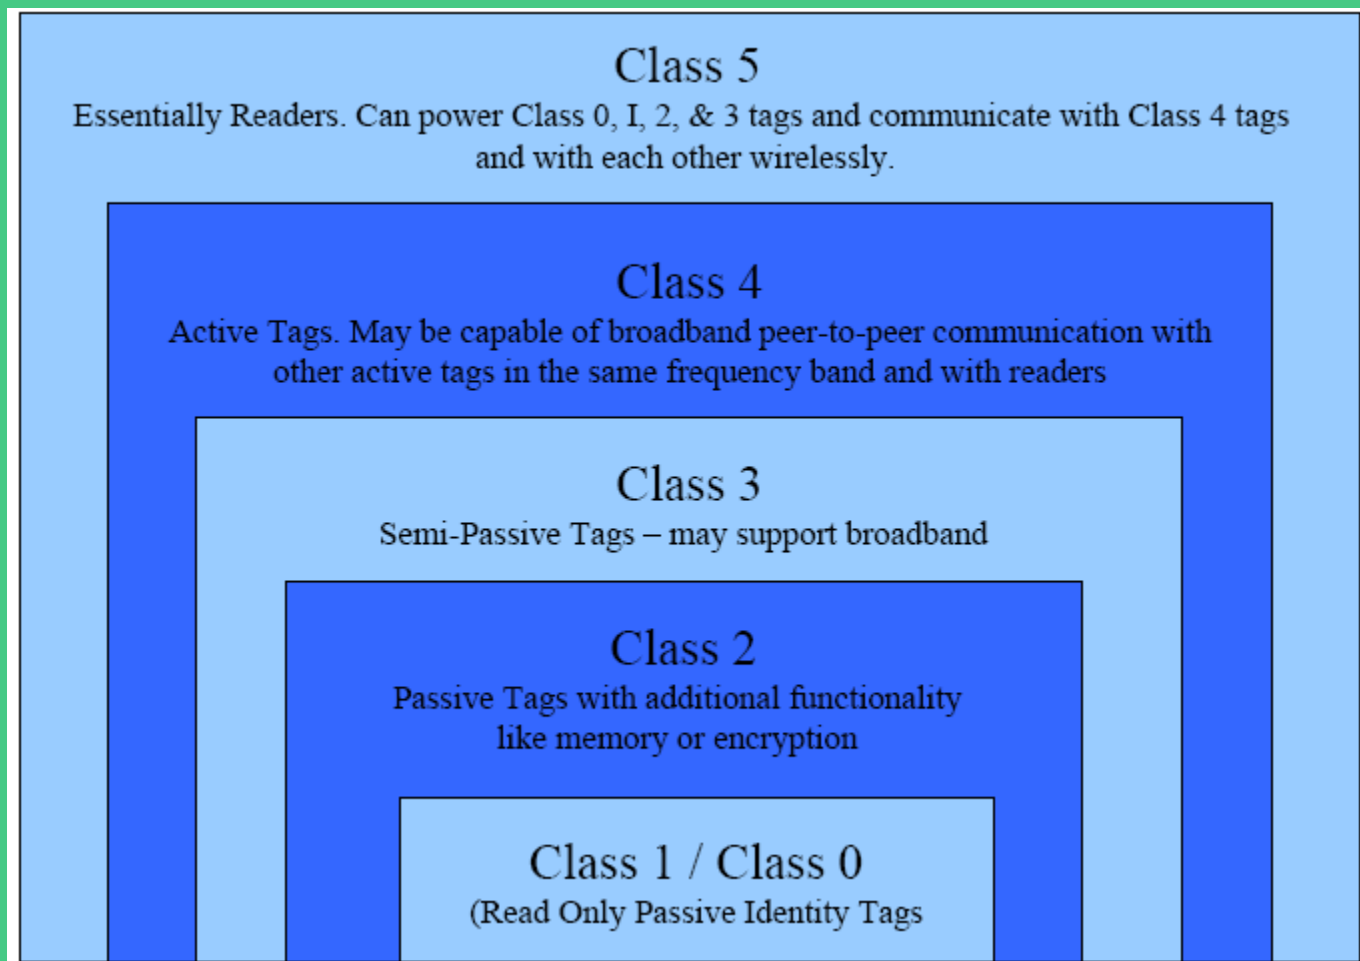

433.92MHz  
(ISO 18000-7)

860MHz 960MHz  
(ISO 18000-6)

2.45Gmhz  
(ISO 18000-4)

# Global Standardizations & Spec.

# Comparison of RFID to Barcodes

## ■ Similarities

- Automate process and improve operations management
- Reduce labor and eliminate human errors

## ■ Differences

- RFID tags can be embedded and hidden (:invisible)
- RFID tags can be re-programmed on-the-fly
- RFID can be used in harsh environments, such as outdoors, around chemicals, moisture, and high temperatures

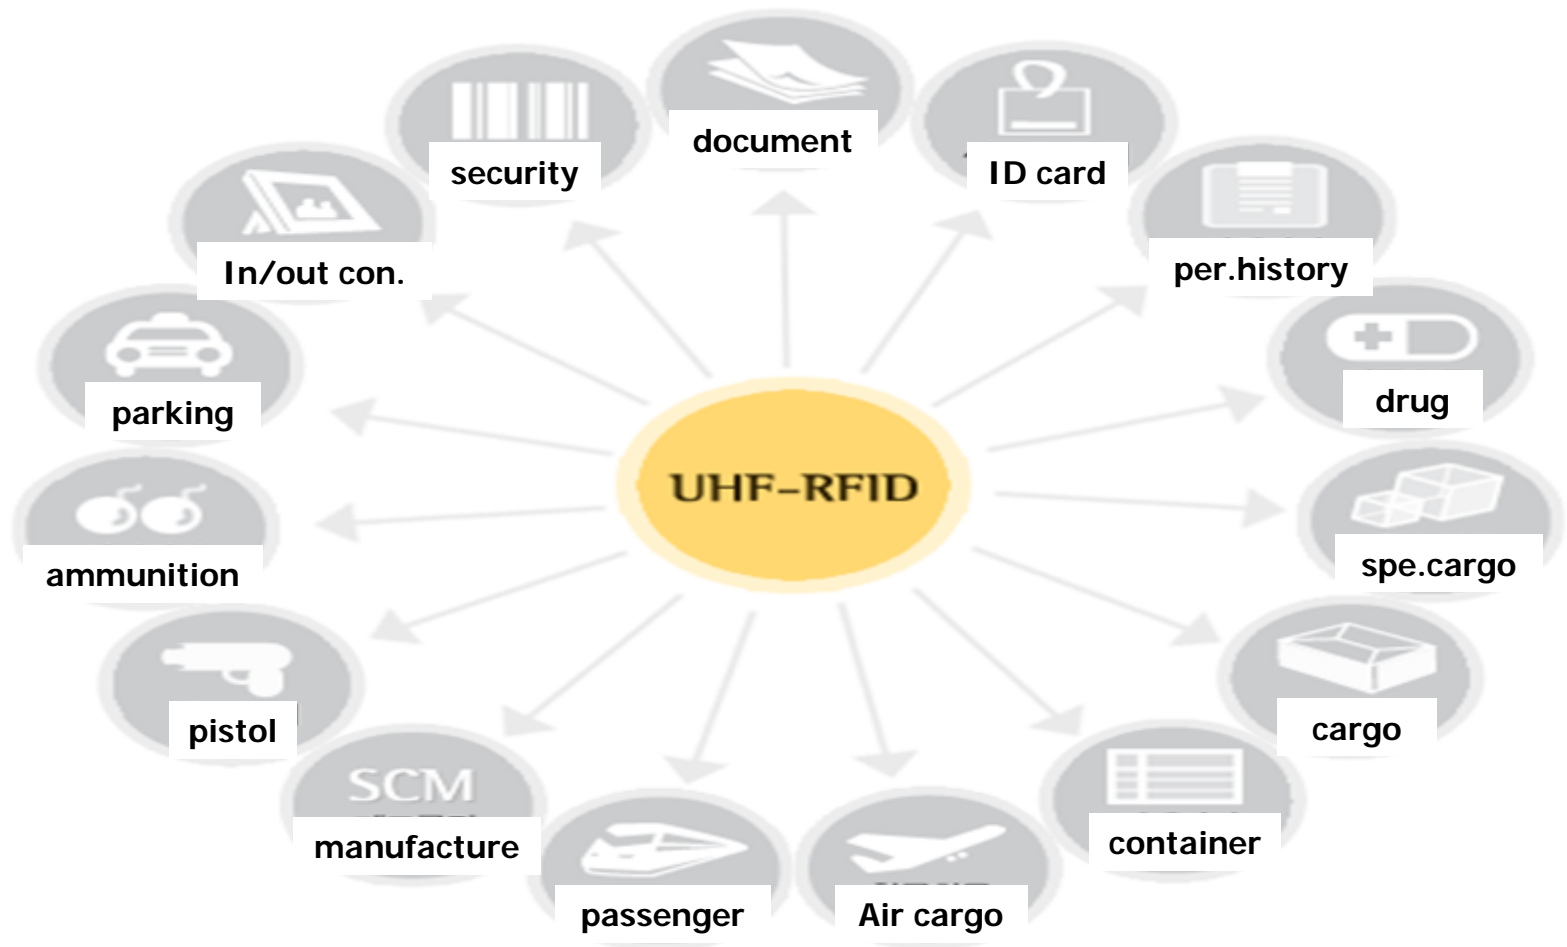

# Current Uses(1)

- RFID has been used in libraries for several years
  - As a security solution
  - For inventory management
  - For self-checkout
  - For automated return systems
- The Eugene Public Library in Oregon has sorters and conveyer belt systems that deposit returned books into specified bins that are linked through an RFID number to specific sections of the library

# Current Uses (2)

- Air Canada uses RFID to track luggage
- Livestock tracking (ear tags) in Australia and Europe
- Wall Mart and the Dept. of Defense are requiring their suppliers to have RFID tags on all pallets and cases they deliver by 2005

# Current Uses(3)

# RFID Advantages and Disadvantages

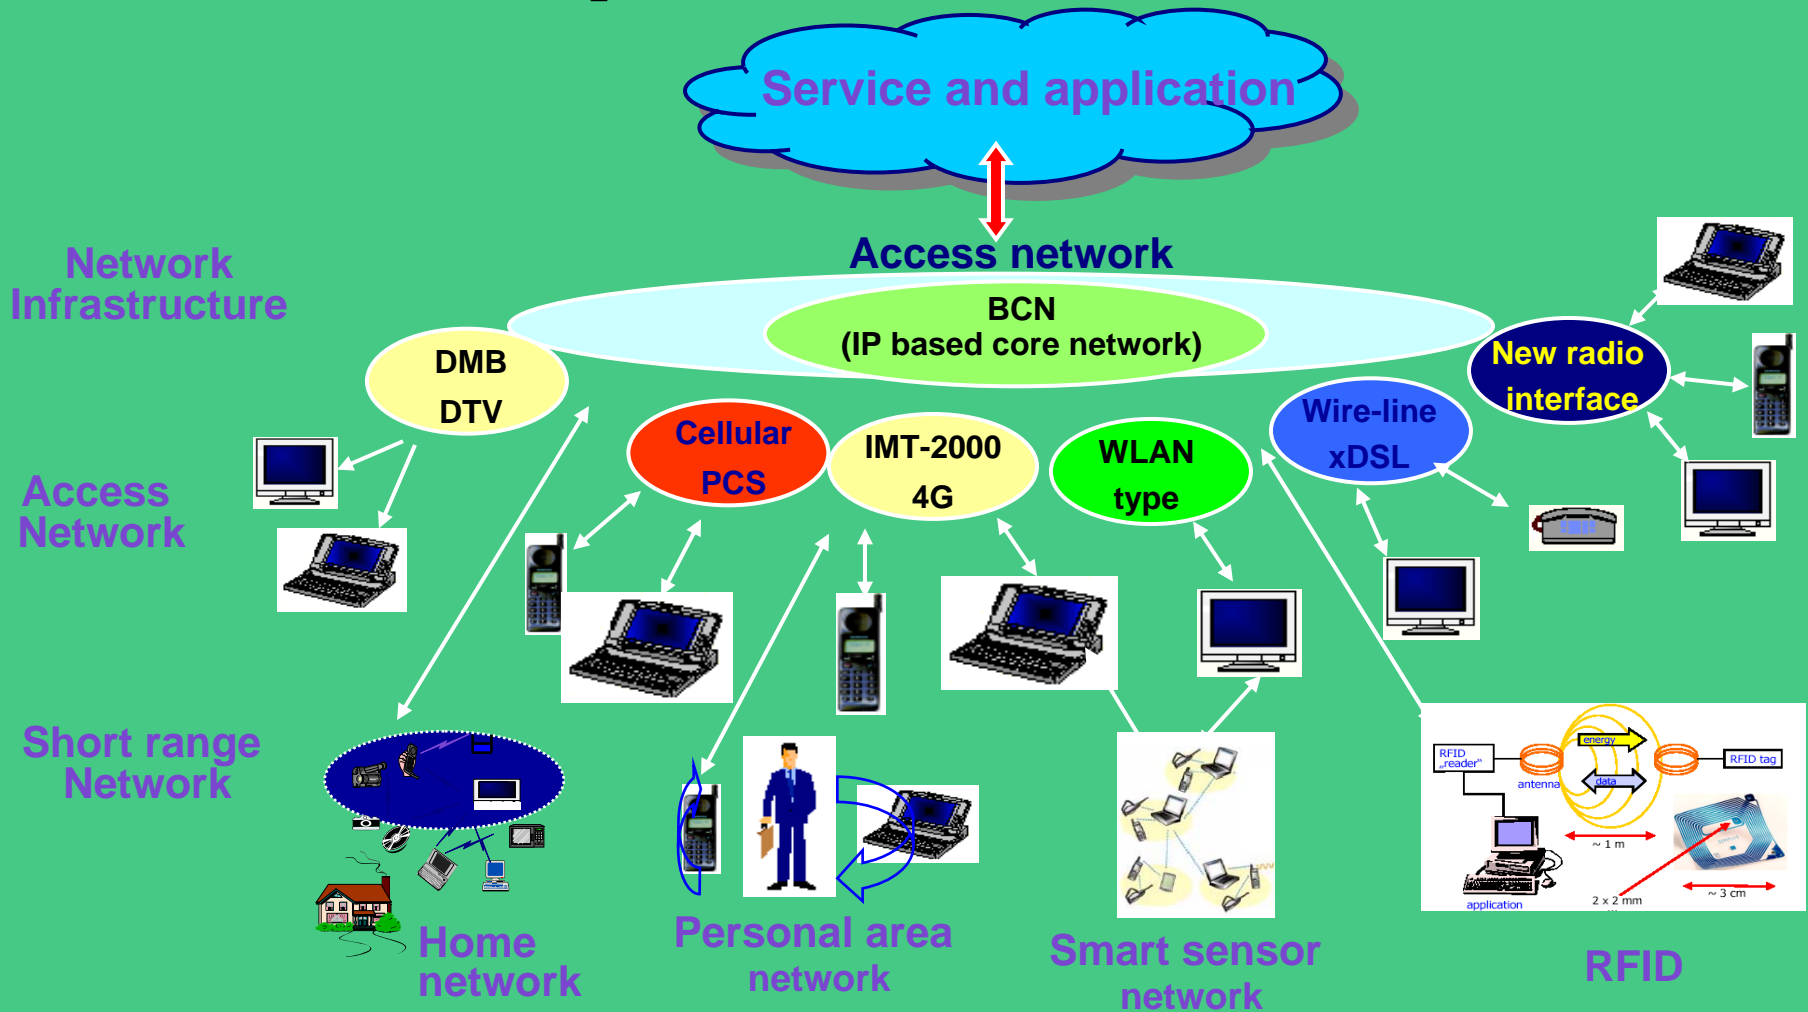

## ■ Advantages

- Offers highly reliable data collection in harsh environments
- Eliminates manual data entry
- Inspires new automation solutions

## ■ Disadvantages

- Privacy concerns

# Key Technologies of Ubiquitous Network

# Background of RFID system

## Application for Marine

**Voice** : SSB, MF, HF, INMARSAT

Objects : Detects by RADAR

AIS : Ship's Infor. Exchange

Satellite : Data, Voice, Image

Only for Large ship ,  
no regulation for small ship

# The Needs for Small Ship Management

1Year : 220 Dead, Missing by Sea Accidents

Number of Illegal Fishing 15,392

Application IT(RFID) system

→ Up to rate of Rescue

To Build for Safety /Clean /Hopeful Sea

# Present Situation of Fishing Boat IN/OUT Port

In & Out Port Report by Visiting Control System(from '72)

Signal Board Exchange

Using at sea Inspection

Return to In port Report

# Signal Board Sample

# Marine RFID Development

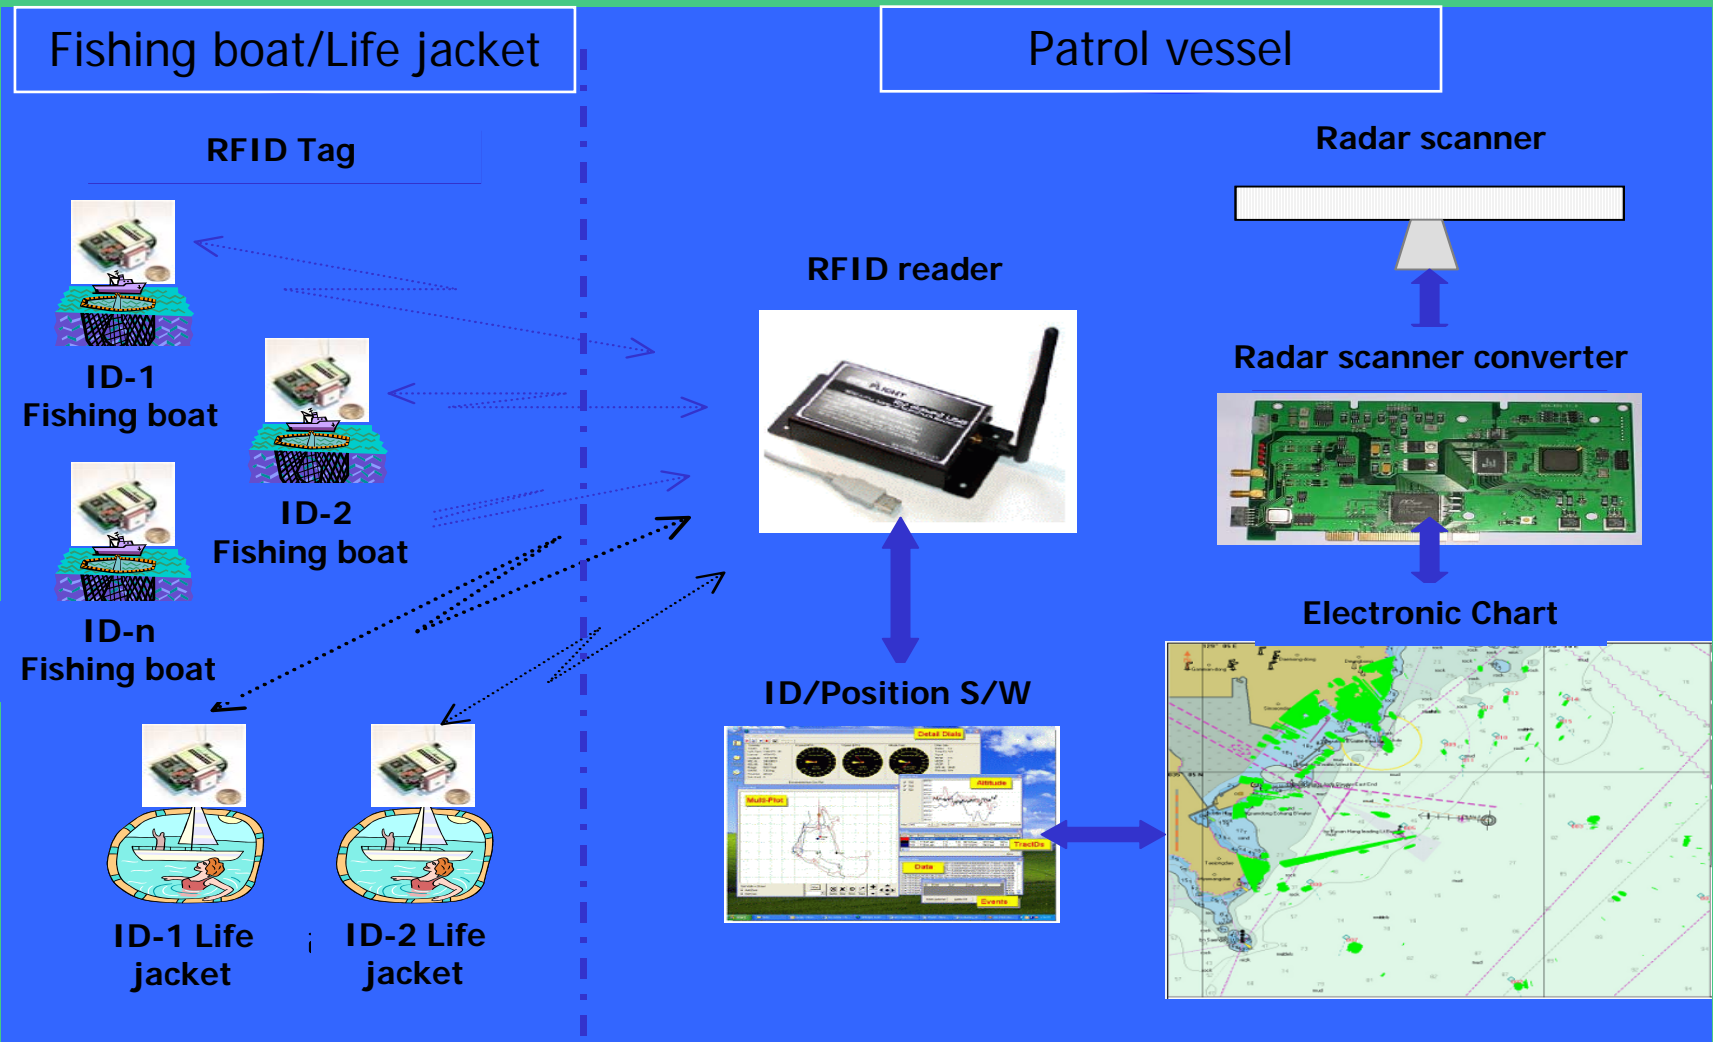

'05. 3~4 Development M/RFID  
Mokpo Maritime Univ.

'05. 5~10 Exhibition

'05. 11 Application APEC

'06. 5 Add Function

# The Concepts of Marine RFID

# Marine RFID Development & Test

Tag for Transmission

Test Record

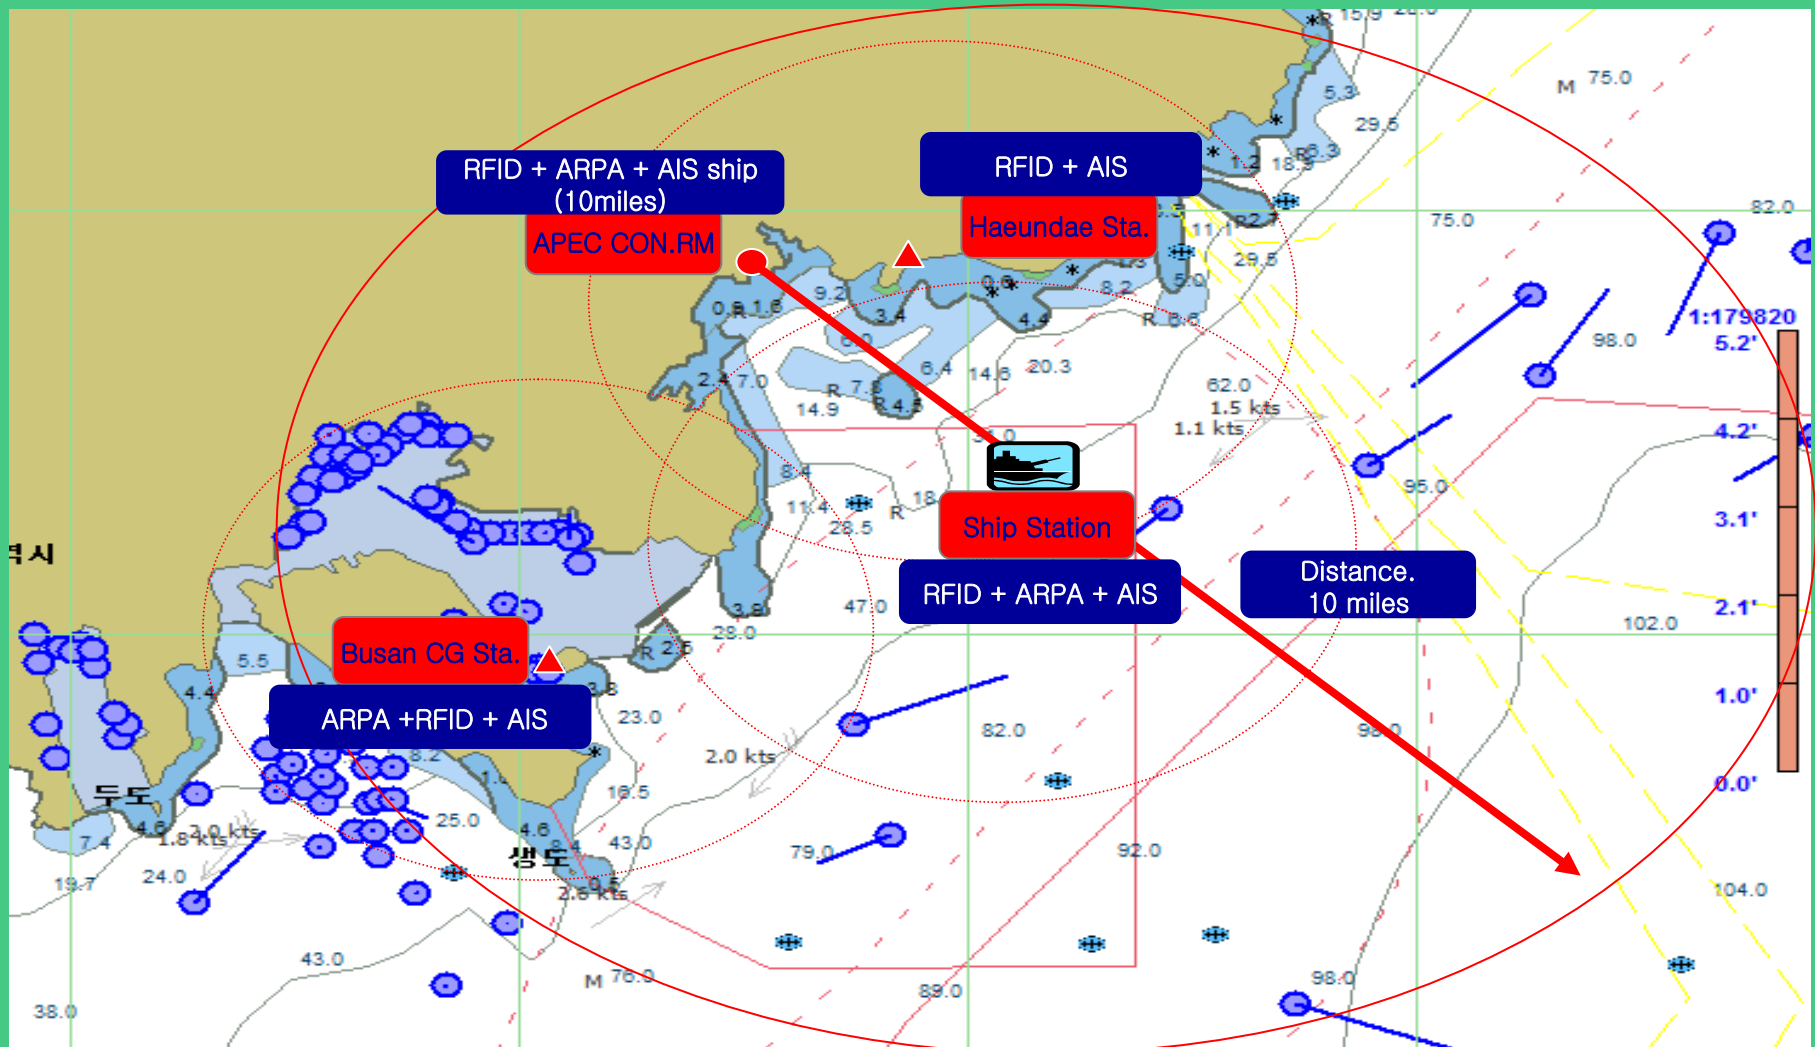

Receiver(Reader)

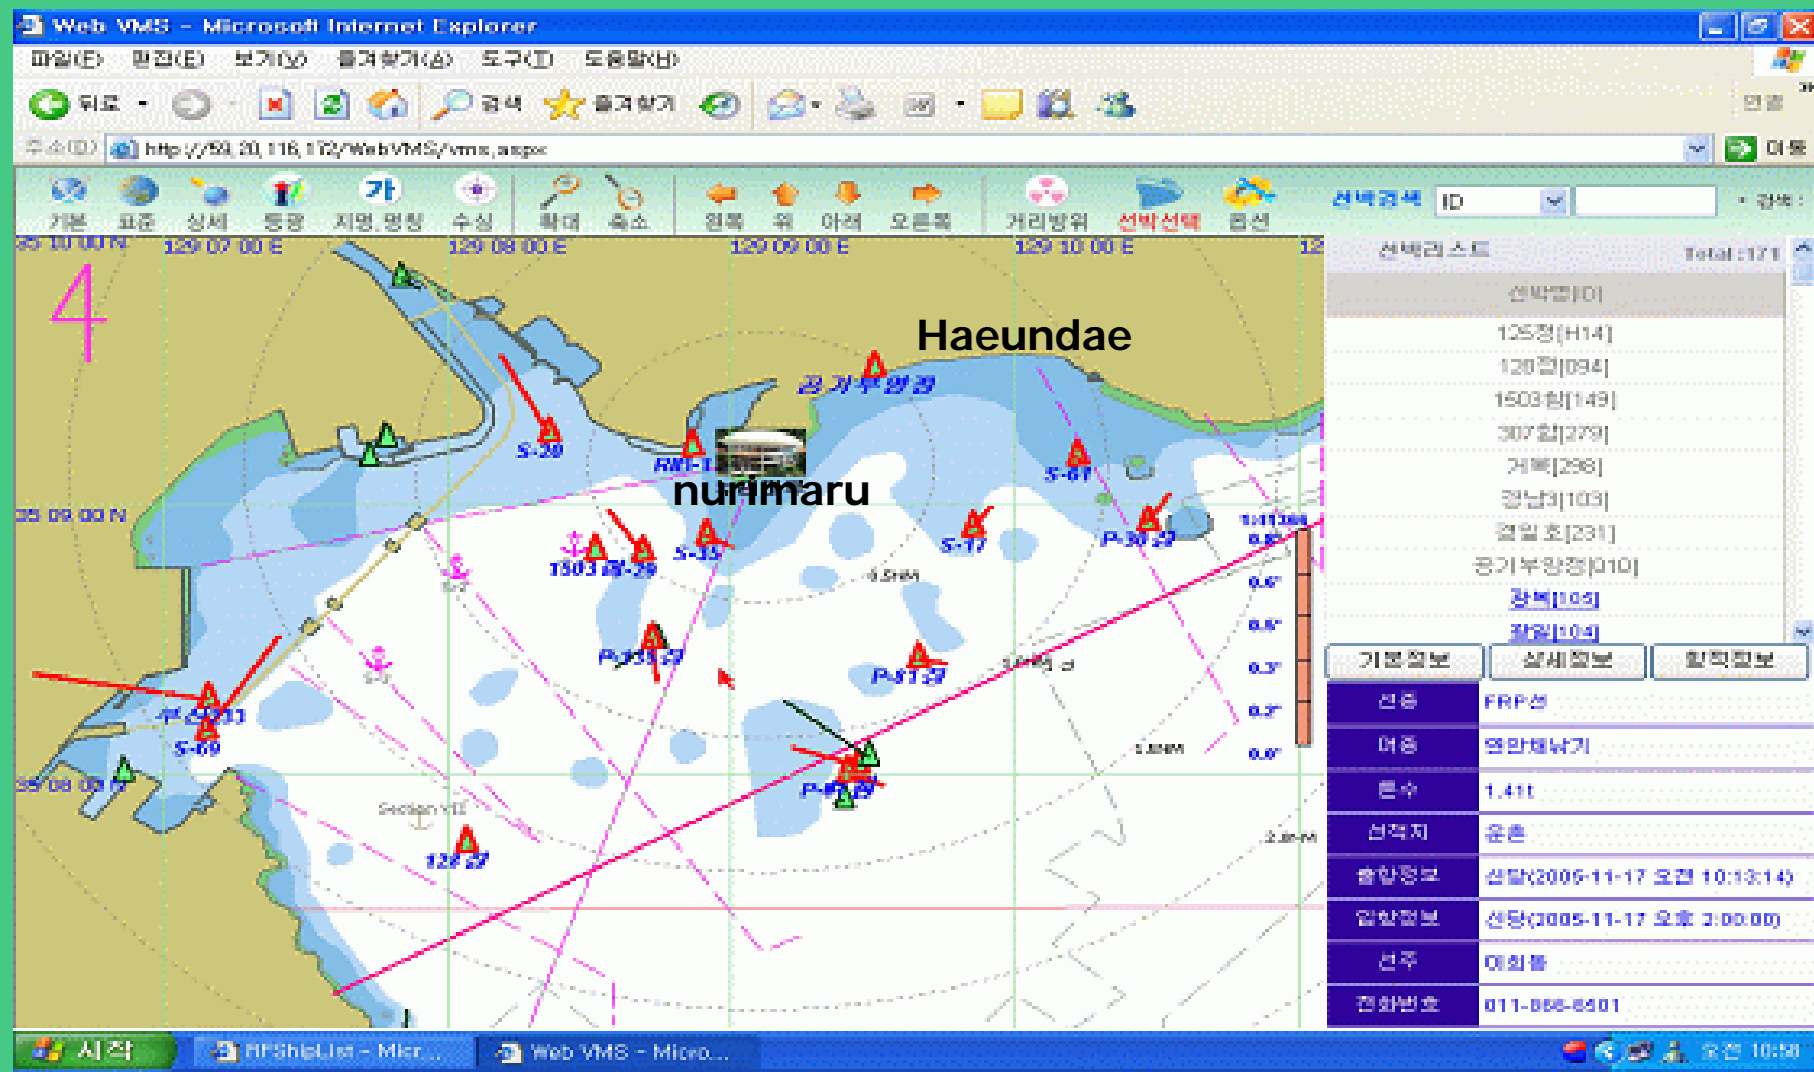

Test Record

# Application for APEC(1)

# Application for APEC(2)

# Application for Others

Improve In & Out Port System

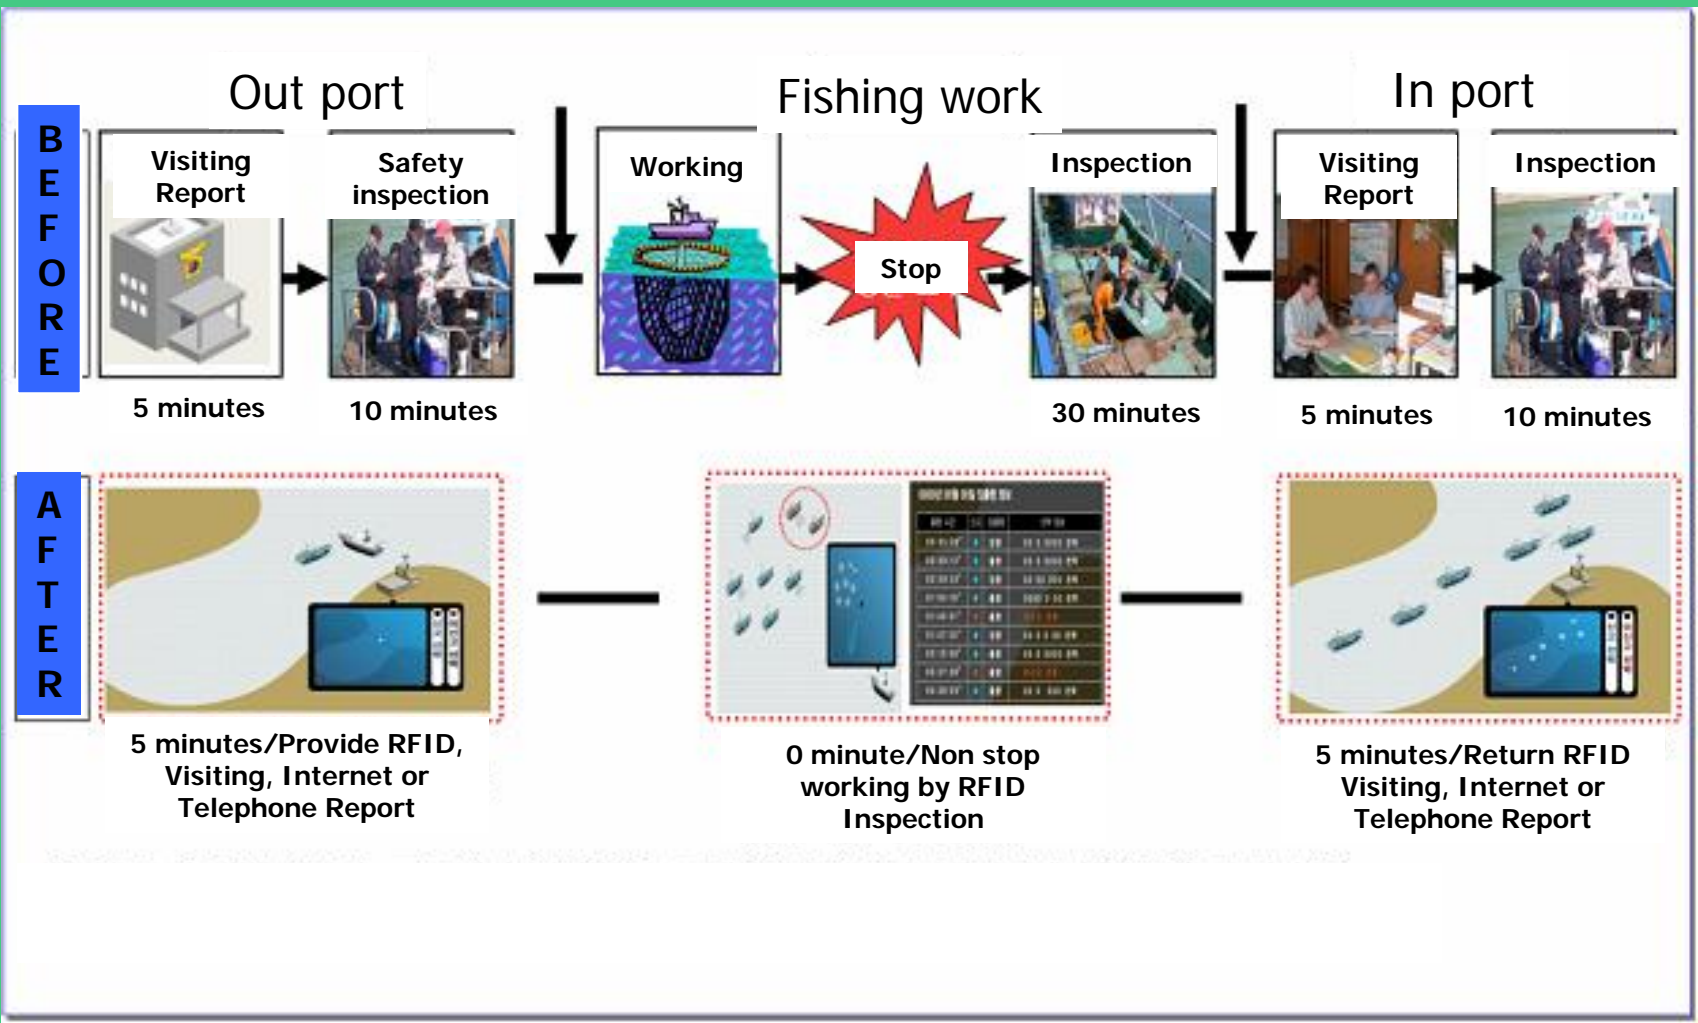

Identification of me & others

Preventing for Disaster, SAR

Terror, Security, Guard at Sea

# In/Out Port System (Ship Free-Pass System)

# Actual Practice Station of ship free pass system

INCHEON Maritime Police Station

- 2500 ea

SOKCHO Maritime Police Station

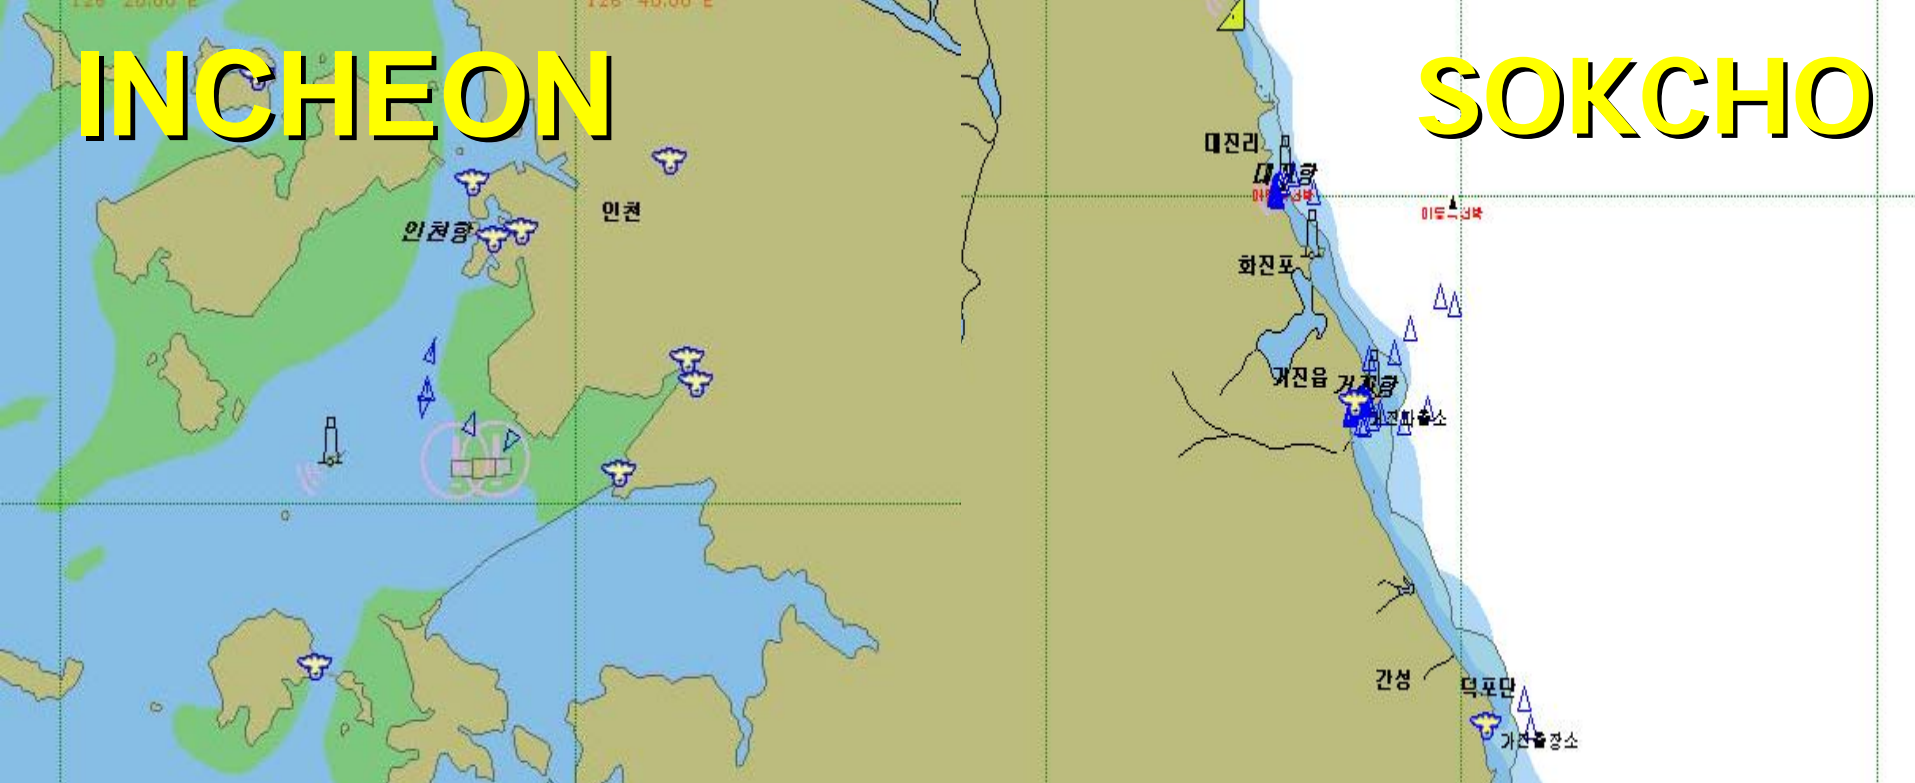

- 2500 ea

DONGHAE Maritime Police Station

- 600 ea

INCHEON

SOKCHO

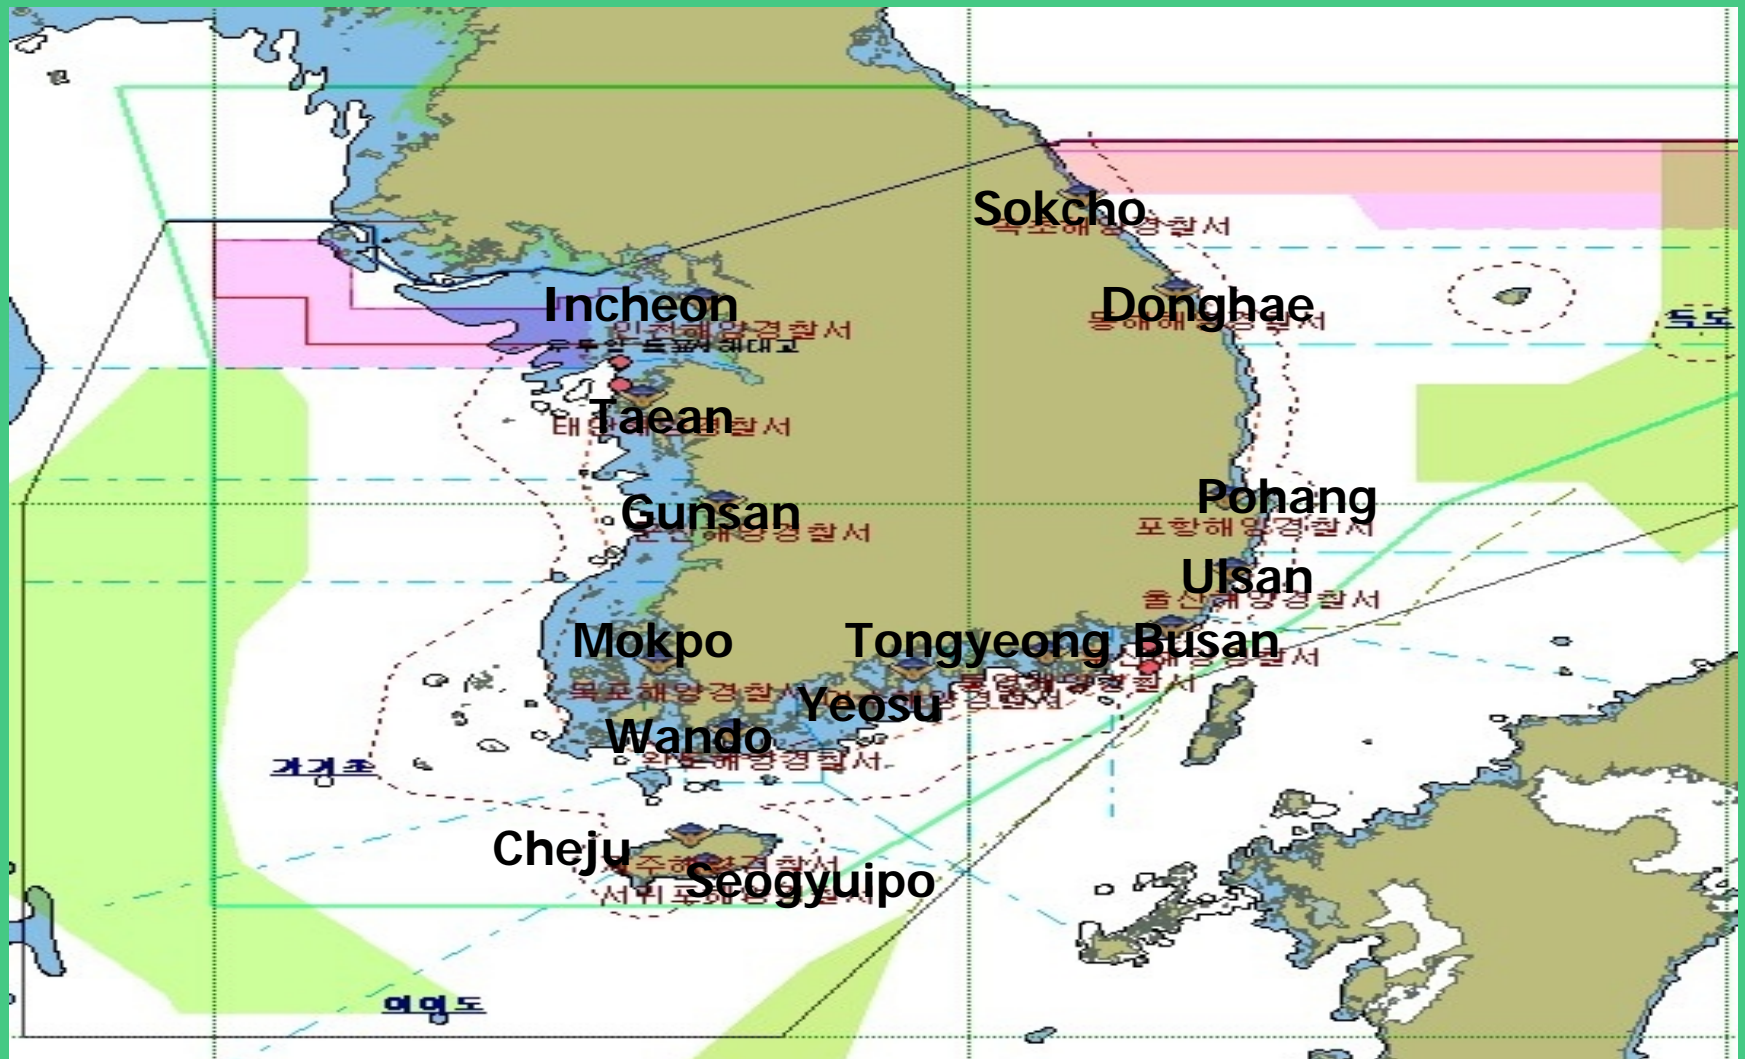

# Plan in the Future

PDA(Personal Data Assistant)

DMB(Digital Multimedia Broadcasting)

All coastal area Application  
by 2013

# Plan in the Future

**Thank You!**
